The 8th European Echocardiography Course on Congenital Heart Disease will be organised in Bologna, from Wednesday 23rd to Saturday 26th October 2013.

This course provides a thorough overview of Echocardiography on Congenital Heart Disease and is aimed at Paediatric Cardiologists, Grown-up Congenital Heart Disease Specialists and Echocardiography Technicians working with Congenital Heart Disease patients. The programme strongly builds on the side-by-side comparison of morphology and imaging and discusses the major abnormalities found in clinical practice. The course prepares for the accreditation examination for 'Congenital Heart Disease Echocardiography' organised by the ESC-EACVI/AEPC.
